

Meet Ariel, HR Operations Leader

Deliver a consumer-grade HR experience while lowering administrative costs

About Ariel

Ariel is a modular, ServiceNow-native HR Service Delivery agent that orchestrates a dedicated team of helper agents to automate the full employee lifecycle—from onboarding to offboarding. Built directly on the ServiceNow Platform using AI Agent Studio and Virtual Agent Designer, Ariel can run autonomously based on configurable triggers, events, or workflow conditions. By eliminating repetitive manual tasks, enforcing policy compliance, and delivering personalized employee experiences across every channel, Ariel helps HR evolve from a transactional function to a strategic enabler of talent growth and organizational agility.

Elevate the employee experience

Employees expect fast, consumer-grade HR support, yet manual processes slow response times and create inconsistent service. Ariel closes that gap with 24/7 conversational self-service across Teams, Slack, and the ServiceNow portal, guiding employees through onboarding, benefits, and policy questions with clarity and consistency.

Personalized onboarding journeys and welcome packets

Always-on HR virtual assistant for PTO, benefits, and policy questions

Cross-channel notifications and reminders tailored to the employee lifecycle

Multi-language support for global organizations

Increase HR productivity

Ariel takes the burden of repetitive casework off HR teams. From automated form processing to intelligent triage and routing, it ensures that high-volume, low-value tasks are handled automatically, allowing HR professionals to focus on strategic initiatives like workforce planning and talent development.

Automated onboarding and secure offboarding workflows

Smart document management: classification, autofill, and routing

SLA-driven case triage and escalation with AI prioritization

Seamless integration with Workday, SuccessFactors, and other HR systems

Reduce administrative costs

By combining self-service adoption with end-to-end automation, Ariel reduces the cost per HR transaction while increasing accuracy and consistency. Standardized processes ensure compliance and minimize regional variance, further lowering operational risk and overhead.

AI-driven deflection of common HR cases and inquiries

Standardized HR workflows across departments and regions

Automated evidence capture for audits and compliance needs

Real-time dashboards to measure adoption and savings

Ensure governance & compliance

HR data is among the most sensitive information in the enterprise. Ariel enforces policy, privacy, and compliance requirements with built-in guardrails, ensuring that every workflow is auditable, explainable, and aligned to global regulations. Ariel also connects with **ServiceNow AI Control Tower** and **Now Assist Guardian** to apply runtime guardrails, protect PII, and continuously monitor performance across every workflow.

-  Configurable human-in-the-loop approvals for sensitive actions
-  Automated audit logs, retention policies, and evidence generation
-  Privacy and security controls embedded in every process
-  Alignment with ServiceNow HRSD Pro features and compliance frameworks

ServiceNow integration & business value

Ariel extends **ServiceNow HR Service Delivery** to deliver a scalable, secure, and employee-centric HR experience.

-  **Higher employee satisfaction and retention** from consumer-grade HR services
-  **Lower administrative costs** through automation and self-service adoption
-  **Improved compliance posture** with auditable, policy-driven workflows
